

CMMC 2.0 Consulting Services

SoundWay has a variety of CMMC and Cybersecurity services to assist Government Contractors prepare for and become certified. As a CMMC Third-Party Assessing Organization (C3PAO), SoundWay has statutory obligations to restrict our services to “consultative” and “C3PAO”. Under our consultative offering, we provide a comprehensive analysis of an organization’s “As-Is” state and provide recommendation on how to achieve a “Future” state. Under our C3PAO services, we provide traditional C3PAO certifications.

The Department of Defense voluntary assessment began in mid-2022. Numerous companies are attempting to get on the approved list for future assessments. As companies continue to procrastinate, their ability to become certified prior to pursuing new Defense contracts in FY 2024 will become more problematic as the demand versus supply of C3PAOs and certified assessors will be disproportional. Do not delay, schedule your free consultation with SoundWay to lock in current pricing that will be honored for up to 12 months.

Comprehensive Pre-Assessment Readiness Reviews

- Detailed review of all Level 2 requirements at the objective level
- Construct a System Security Plan using a is clean, concise, and acceptable by assessors.
- Create Plans of Actions and Milestones (POAMs) with cost benefit analysis.
